### SUMMARY

I'm a Full Stack Software Engineer with 4 years of experience in Web Development. I have 4 years of experience in Back-End Web Development and 1 year of experience with Front-End Web Development.

With experience in handling logic problems I can solve backend logic problems. I also spend time learning new technologies while the technology market is moving very fast so I can become a better programmer every day.

### TECHNICAL SKILLS

#### Programing Languages:

- PHP
- Javascript, Typescript

#### Frameworks/Platforms:

- Laravel, Codeigniter, Wordpress
- ReactJs, VueJs
- Jquery, Bootstrap 5, Bootstrap Vue
- HTML, CSS, TailwindCss

#### Database Management Systems: MySQL

#### Others:

- Github, Gitlab, Bitbucket
- Understanding of OOP methodologies, SOLID principles and Design pattern
- Apache, Nginx
- Basic experience of Docker, Linux, Gitlab Server, CICD
- Experience in handling 3rd party APIs
- Basic English (Listen, Read, Speak)

### PROJECT

#### Hapilogi (Japan) - Backend Software Engineer

(6/2023 - NOW)

**Project:** Hapilogi

**Description:** Hapilogi is a connection service from sellers, warehouses and shippers, helping to manage orders and inventory, in addition it connects to online stores through a 3rd party API.

#### Technology:

- **Backend:** PHP, Laravel
- **Frontend:** ReactJs, Material UI

#### Responsibilities:

- Implement the link function code, synchronize from the Hapilogi system to 3rd parties such as amazon, shopify
- Implement frontend functional code based on frontend coding rules. From these additional roles, I understand and can learn more React and typescript.

- Writing unit tests and retesting coded functions helps me re-evaluate the code and limit bugs when going to the development environment.

### **FPNET (Japan) - Front end Software Engineer**

**(1/2024 - NOW)**

**Project:** FPNET

**Description:** FPnet is a project that manages document information from copyright-registered and published writers and authors to readers who have accounts and purchase author services.

**Technology:**

- Backend: Ruby on Rails
- Frontend: NextJs, TailwindCss

**Responsibilities:**

- Convert ux and ui from figma to react based on tailwindcss, call the api and handle them
- Handle asynchronous errors and fix bugs

### **Service connect (Japan) - Full stack Software Engineer**

**(6/2023 - 10/2023)**

**Project:** Service connect

**Description:** Service connect is a sub-project of Hapilogi that helps connect delivery shippers to seller warehouses, issue invoices and invoices from suppliers.

**Technology:**

- Backend: PHP, Laravel, Laravel InertiaJS
- Frontend: VueJS, Tailwind CSS

**Responsibilities:**

- Perform logical functions to display data on the screen, export pdf, csv
- Implement UX, UI Design and responsiveness on TailwindCSS

### **Unipocard (Vietnam) - Full stack Software Engineer**

**(5/2020 - 10/2020)**

**Project:** Unipocard

**Description:** Unipocard is an online shopping project based on wordpress and has online payment via 2checkout payment gateway.

**Technology:**

- Wordpress, HTML, CSS

**Responsibilities:**

- Connect the 2checkout payment gateway through the API, from there I can clearly understand the basic connection conditions of 3rd parties, especially the payment gateway.

### **Hito Employee (Japan) - Full stack Software Engineer**

**(1/2021 - 3/2022)**

**Project:** Hito Employee

### **Hito Booking Room Management (Japan) - Front end Software Engineer**

**(4/2022 - 10/2022)**

**Project:** Hito Booking Room Management

**Freelancer Project in Free time****(2020 - NOW)****Technology:**

- Codeigniter, Wordpress
- HTML, CSS, SASS
- Javascript, JQuery

**EDUCATION****Ho Chi Minh City University of Industry and Trade (8/2017 - 8/2020)**

- **Study:** Information Technology
- **Degree grade:** Good
